Summary

I'm Arbab Tahir. I'm a Front-end web developer who loves writing code, building things, and solving problems. I build software and write code. I write bugs and call them features. I know multiple programming languages like Html, CSS, and Javascript (ReactJs, NextJs), and I use Frameworks for the front-end like (Bootstrap, Vuejs, React Bootstrap) and some others. Javascript is my major programming language. I work with different technologies every day. I like learning new things. In my free time, I read books, read poetry.
